

Dear Sirs, I am writing to you to comment AGAINST the proposed "Partial Forbearance From The Commercial Mobile Radio Services Number Portability Obligation". My firm will be greatly be inconvenienced by the passing of this Law. I believe that any cell phone customer should have the option to switch cell phone provider and be able to do so without having to change his/her phone number. Forcing customers to change their phone number has quite large repercussions on cost, time and loss of business due to the interim time spent in contacting the clients. Thank you very much for your attention
